All the cameras are deployed right now. Let me get with my tech guy and see what's we can do. City Council has been hounding me for cameras on sites.

Subject: CES: Theft of Batteries from SWS Vacuum Truck

Steve:

This is just for your information.

We had a theft of batteries from a vacuum truck. Not sure when it actually happened because the equipment was not check till this morning as SWS has returned to lower the stormwater in the back after yesterday's storm event. The theft could have occurred beginning Thursday Night 9//11/14 - Wednesday Morning 9/17/14. The batteries theft was approximately \$475 according to SWS.

I was wondering about the stash of camera that you have at your office and if those would be useful at this site to document activities while we are not on-site. Your expertise would be needed to determine proper placement. Let me know what you think.

Thanks

Gary Moore
